

## Special Features

Compared to a regular round Duplo Horseshoe, the toe area of the Duplo Straight Toe Shoe (STS) is slightly straightened. That way, you can shift the horseshoe's position on the hoof backwards and thus facilitate an early breakover.

Compared to the other Duplo Horseshoes, the quarter clips of the STS models are positioned a little bit further backwards.

## STS Models

### STS without Quarter Clips

- straight toe

### STS Clipped

- straight toe
- two pushed-back quarter clips

### STS Clipped and Threaded

- straight toe
- two pushed-back quarter clips
- two M8 threads in the heel area

### STS Clipped with Ring-Shaped Metal Inlay

- straight toe
- two pushed-back quarter clips
- ring-shaped metal inlay

### STS Clipped with Grid/Closed Sole

- straight toe
- two pushed-back quarter clips
- depending on the horseshoe size, you may still receive the version with grid sole

### STS Clipped and Threaded with Ring-Shaped Metal Inlay

- straight toe
- two pushed-back quarter clips
- two threads in the heel area  
up to 110mm: M8  
from 114mm: M10
- ring-shaped metal inlay

### STS Clipped and Threaded with Grid/Closed Sole

- straight toe
- two pushed-back quarter clips
- two M8 threads in the heel area
- depending on the horseshoe size, you may still receive the version with grid sole

This model is only available in **Standard** !

## STS Wedges

In case of certain diagnoses, the use of wedges can be useful. There are special wedges for the STS models which are precisely adjusted to the shape of the horseshoe.

- ➔ solid and torsion-free ring shape
- ➔ anatomical sole relief
- ➔ change of hoof angle by 2,5 degrees (one wedge) or 5 degrees (two wedges welded together)
- ➔ easy application without cutting or welding

### Careful:

The Duplo STS Wedge is only combinable with a clipped Duplo STS Horseshoe!

*The STS models are available  
from size 102 to 154!*
